## Extensive short and long term trading strategies

### **BI-Weekly Risk and Portfolio report**

“Bi-weekly risk and portfolio optimization report” is focused on trading and risk mitigations strategies on Hungarian and SEE markets. It contains concrete advices and strategies for trading and managing of opened positions for: Week+1, Week+2, Month+1, Month +2, Quarter+1, Quarter+2, Year+1 products.

The “Bi-Weekly risk and portfolio report” is delivered as an extensive document 30-40 pages document on bi-weekly basis which contains advices for trading and the most important global and regional factors which can impact Hungarian and SEE power markets during the next two weeks. With the report you get an optional bi-weekly telco with our expert, who will discuss with you proposed trading strategies and underlying analytics on which the trading strategy is based on.

## Month ahead trading strategies

### **Month-ahead Trading Advisory and “HUPX+SEE Trading Tool”**

“Monthly trading advisory” is an extensive month-ahead forecast and analysis of Hungarian and SEE markets. This type of service is intended to give detailed analytics, alternative ideas, trading strategies, out-of-the box thinking - with a goal to challenge opinions, actions and strategies of your traders and analysts.

“Trading Strategy” document is published some 30 days before the delivery month starts. Subscription to “Monthly trading strategies” also includes a 2-hour long personal presentation and discussion with our expert - where we further explain risks, opportunities and our standpoints from the document.

## Daily trading strategies for HUPX and HENEX

### **“HUPX + SEE Spot Support” and “HENEX price Forecasts”**

Day ahead forecasts for Hungarian and Greek power exchanges and are published at 08:30 CET. In addition to hourly price forecast, aim of daily reports is also to provide spot traders with all the data and analytics they might need for day-ahead trading, live power plants outage info and all other information relevant for spot trading.

HUPX + SEE Spot Support report also includes Week-ahead HUPX forecast, while HENEX report includes Month-ahead HENEX forecast.

## Know what happened on your market with ex-post monthly review

### **“Hungarian and SEE markets monthly review”**

The report provides analytics and explanations of price moves which happened on forward and spot markets in the previous month on Hungarian and SEE markets. The Report provides detailed explanations on of what was happening on regional markets and what were the reasons for that.

The report is intended for Regulators, Transmission System Operators, Power exchange Administrators, Utilities, Ministries of Energy and Assets owners. The aim of the report is to help them understand reasons and consequences which happened on markets which they regulate or on which they operate. The report can also be useful for traders to re-evaluate their decisions during the past month.
